24/7 EMERGENCY SERVICES

We know a crisis doesn't just hit between 7am – 5pm. We are staffed with technicians who are on-call and available day or night. Our customer service teams have around-the-clock remote access to our inventory and information systems, so we are never closed. Whether specifying a new pump or valve, checking inventory, or dispatching technicians and delivery personnel, we are ready for the challenge.

Our hours are your hours. Whenever and wherever you need us, Precision will be there.

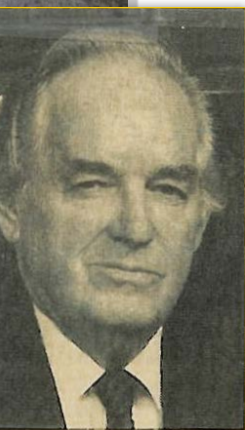

WHAT MAKES US DIFFERENT?

Our number one goal is to get and keep you up and running. We pride ourselves on getting the job done safely, correctly, and quickly to offer you maximum value. In the shop or in the field, our factory-certified technicians have the skills, equipment and can-do attitude to do it right, the first time, every time. Combined with our knowledgeable and experienced support staff, Precision will get you what you need, whether it is on our shelf or halfway around the world. We stand behind our products and services, no matter how tough the job. That is the Precision Difference. Let our quality work harder for you.

WHO IS PRECISION?

Precision is a 3rd generation, family owned business founded in 1956. With factory-authorized service locations in Charleston, WV and Louisville, KY, and sales offices throughout the Ohio Valley, we are always a phone call away. We have built our reputation providing quality products and services to customers in the municipal, power, chemical, and oil & gas markets. Precision is built on the pillars of safety, quality, and unheard of service. Thank you for allowing us the opportunity to exceed your expectations.

Harry Kemerer, Founder

VALVES & ACTUATORS

Precision is proud to be recognized as your local authorized Green Tag Center (GTC) for GE Consolidated® safety and safety relief valve products. The GTC authorization gives you the best-in-class benefits of GTC exclusive programs such as factory trained GTC repair technicians, EVT-PRO® auxiliary PRV in line testing, SRVSpeQ® valve sizing program, and the one of a kind industry leading ValvKeep® asset management database. Whether it's providing you with a new Consolidated® or repairing your existing PRV, our factory certified Green Tag Center® technicians and inside support people are always available to exceed your expectations.

Distributor
Consolidated Products

ValvKeep® II is a state-of-the-art, fully customizable valve management database system designed to assist our customers with the storage, management and maintenance of their safety, safety relief, control and block/line valve historical information. With a variety of reporting methods, this program can greatly assist our customers in maintaining their equipment with day-to-day and out-of-age maintenance needs required to comply with OSHA regulations.

Isolation and Control Valves

Precision provides complete valve repair, calibration and testing of all types of Gate, Globe, Check, Control, Pressure Seal, Butterfly, Plug, Ball, Knife Gate, Wye Pattern, Stop-Check, Manual Blowdown, Tilting Disc, and Diaphragm Valves. Whether the valve is manually operated or has a sophisticated valve actuation system, our technicians will take total responsibility for the expert diagnosis and repair of the complete package.

- Full repair and testing up to 78" of manual and control valves
- Hydrostatic testing capabilities up to 30,000 psi
- Portable high pressure packing extraction
- Certified packing installation for both Chesterton and Garlock
- Factory repair/modification authorizations (shop or technician) from Velan, Powell, Durco, Masoneilan, Fisher, Valtek, Anchor Darling
- Specialty cleaning services for oxygen, chlorine, hydrogen peroxide, hydrogen sulfide, ethylene oxide, or to customer specifications
- Gear box and actuator repair

PUMPS & CONTROLS

FLYGT

Precision is a Distributor and Authorized Repair and Warranty Center for Flygt products in the Municipal, Industrial, and Construction & De-watering markets.* We also carry a broad array of other pump lines to meet all your flow control needs. Our factory-trained technicians are experts at quickly identifying the problem and coming up with a workable solution. Whether using genuine OEM parts or modifying existing parts in our machine shop, we provide a Precision-backed repair you can depend on. Our pump service capabilities include:

SHOP

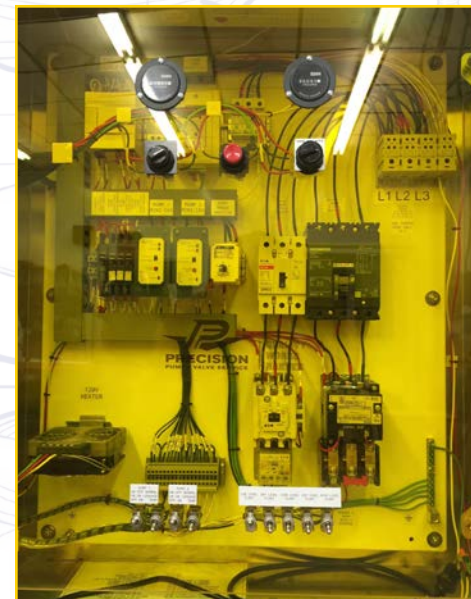

- Submersible Pump Repair of all Makes and Sizes
- Vertical Turbine Repair through 36" Bowl
- Split Case Horizontal Repair Capabilities
- ANSI/End Suction Repair Capabilities
- Pump Skid Fabrication Services

FIELD

- Turnkey Pump Station Installation and Repairs
- Control Panel Troubleshooting and Repair/Replacement
- Pump Station Preventative Maintenance (PM) Program
- Pump Removal/Installation Capabilities
- Retrofit/Renovation/Conversion of Existing Pump Stations
- Alignment Services

Authorized to sell new Flygt hardware in certain geographical territories.

From the smallest to the largest control systems, Precision is proud of each and every control panel we manufacture. Our skilled design and build team can customize your panel to whatever is needed. Our innovative products and components help keep your system communicating effortlessly and running efficiently, saving you time and energy. Of course, we offer technical field expertise to help troubleshoot your existing panels, and our staff of engineers and customer support professionals can provide around-the-clock answers to all your questions.

OIL & GAS

Precision provides numerous services throughout the Oil & Gas Industry. In addition to repairing a variety of pumps and valves all throughout compressor stations, our technicians are DOT-certified and are trained to repair and test various pipeline valves. Our Wellhead division is experienced in doing preventative maintenance work like greasing of trees and individual valves, and testing relief valves in the field. Along with providing new wellhead API 6A equipment, other services include change-outs, machining, valve and pump repair, and consultations. All our services are backed by our Precision guarantee and come with a fully documented inspection report.

- Maintenance services to keep wellhead and valves performing optimally. Multiple crews available 24/7
- Offering API 6A products for new wells, re-completions and de-completions
- Wellhead consultant available 24/7
- Full service repair and machine shop for all types of makes and models of valves and wellhead equipment
- Fully documented inspection report
- Secure electronic database with password-protected customer web access, to assist with documentation, record keeping and maintenance scheduling
- Compliant with Veriforce, ISNET and other safety certification databases
- Emergency on-site valve removal and replacement services
- Our technicians are DOT compliant

OTHER SERVICES

Need something repaired? Chances are, we can do that! We often hear our customers say, "We didn't know you did that!" In addition to a large variety of pump and valve repair capabilities we also have decades of experience in the following:

- Field Machining Services
- Welding Qualifications
- Sight Glass/Level Gauge Repair
- Turnkey Removal and Installation Services
- Positive Material Identification (PMI) Services
- Specialty Cleaning Services (all types)
- Gearbox and Actuation Repair
- Bolting and Torquing Services
- And much, much more!
